Development of Peru’s Asparagus Industry

Study Questions

1. What is appropriate compensation for the “losers” of a policy to bring water to Ica? These could be either the residents of Huancavelica or the small farmers in Ica.

2. What are the consequences if the central government instead of the regional government is directly involved in the dialogue with investors? How do you think the investment projects would differ if Cilloniz were directly involved with investors?

3. What should be the consequences of overuse of the aquifer or illegal well drilling?

4. What are the political consequences of bringing water to Ica? Are there any situations in which it would be more beneficial to just reduce output and take an economic hit?

5. How can Cilloniz ensure that corruption is minimized when rolling out this project?
